CENTRAL INTELLIGENCE AGENCY

## Destination of Finished Products

- 6. Shoes were packed in crates and taken away in trucks. It appeared that they were sent to the town. However, it was also observed that Moscow, Minsk, and other towns were marked on the crates.
- 7. It was said that rubber sheets were used in the armaments industry. These sheets were loaded onto trucks without being packed, from which it appeared that they were not intended for distant transport.

## Security Measures

8. The factory was surrounded by a fence approximately 2.5 meters high. Passes were examined at the entrances by armed factory guards (men and women).

## Layout of Factory

9. Por plan see sketch No. 2 of attachment.

## Key to Sketch No. 2

- 1, 2. Administration buildings of two stories.
  - 3. Research station and Laboratory.
  - b. Stores and shipping departments; with ramp.
  - So-called Center, about two stories high. Freliminary processing of bulk rubber took place here. Some of the workers were gas masks.
     Electrical Station.
- 7-10. Four workshops where the shoes and rubber tubes were produced.
- ll-lh. Froduction of rubber sheets took place here. The buildings communicated with one another. Finished articles were sent from here to Store No. 2 (16 on sketch).
  - 15. Fire-fighting appliances in sheds.
  - 16. Store No. 2.
  - 17: No observations were made in this area: There were five or six moderntype buildings here. 50X1-HUM
  - 18. Main entrance with sentry box.
